Under Restraint: No

Summary of Incident

Summary of How the Death Occurred: (max. 30,000 characters)

Summary:

On Friday, September 23, 2022, at approximately 6:12 p.m., Ariel Nicole Henley (W/F 12-04-1996, 25 yoa) was booked into the Dallas County Jail at 111 W. Commerce St. City of Dallas, Dallas County, TX 75207, for a Dallas County Probation Violation - theft Property >=\$2,500<\$30K, warrant (F1648260J). HENLEY remained in the Dallas County Jail, BNO 22036587.

On Wednesday, October 5, 2022, at approximately 5:02 p.m., HENLEY was reassigned to the North Tower Gill Hernandez Medical Facility, Unit NG03, Bed #8.

On Wednesday, October 5, 2022, at approximately 6:30 p.m., HENLEY was lying on her bed when jail staff recognized that she was choking on what appeared to be blood coming from her mouth.

Additional jail staff and facility medical staff responded. HENLEY was transported by ground ambulance to the Emergency Room at Parkland Memorial Hospital at 5200 Harry Hines Blvd., City of Dallas, Dallas County, TX 75235.

On Wednesday, October 5, 2022, at approximately 7:46 p.m., Doctor Melissa Smith (PMH) pronounced Ariel Nicole Henley (W/F 12-04-1996, 25 yoa) deceased.

On Thursday, October 6, 2022, a forensic autopsy was conducted at the Dallas County Medical Examiner's Office, and the findings are pending, IFS-22-19890-ME.

DSO Service #22-053886.

FINDINGS:

I. Per report, the decedent was an inmate and was hospitalized on September 28, 2022 for complaints of cough, right sided chest pain, and uncontrolled diabetes mellitus:

A. Clinical history of type I diabetes mellitus:

1. Clinical history of previous episodes of diabetic ketoacidosis

B. Clinical history of G3P2002 with second trimester pregnancy (26 weeks gestational age)

C. Initial evaluation and radiologic imaging on hospital admission revealed:

1. Tachycardia

2. Normotensive and afebrile

3. Diminished breath sounds bilaterally

4. Consolidation of the right lower lung lobe

5. Leukocytosis (elevated white blood cell count), anemia, and thrombophilia

6. Blood glucose 282 mg/dL and Hemoglobin A1C 9.6%

7. Negative for respiratory viruses including COVID-19 (SARS-CoV-2), influenza, and respiratory syncytial virus (RSV)

D. Clinical history of sputum culture on September 29, 2022 positive for heavy growth of *Stenotrophomonas*

maltophilia status post empiric antibiotic therapy

E. Her clinical condition improved and she was discharged back to jail on October 5, 2022

F. Later in the day on October 5, 2022, the decedent reportedly went into cardiac arrest at the jail following large volume hematemesis.

Despite resuscitative efforts, she could not be revived and was pronounced dead in the emergency department.

II. Angioinvasive pulmonary mucormycosis and bacterial pneumonia:

A. Pulmonary congestion and edema, combined lung weight 1310 grams, with irregular consolidation, namely within the right lung lobe

B. Microscopic lung parenchyma with angioinvasive mucormycosis, bacterial pneumonia with Gram positive coccoidal organisms, and diffuse alveolar damage superimposed on organizing pneumonia

C. Grossly aspirated blood within the parenchyma of both lungs

III. Postmortem nasopharyngeal swab is positive for SARS-CoV-2 (COVID-19)

IV. Intrauterine pregnancy:

A. Male fetus, 1060 grams:

1. Measurements consistent with 26 weeks gestational age

2. No evidence of maceration

3. No congenital anomalies or external dysmorphisms

B. Three-vessel umbilical cord with one true knot

C. Unremarkable placenta with no gross abnormalities

CONCLUSIONS:

Based on the case history and autopsy findings, it is our opinion that Ariel Nicole Henley, a 25-year-old female, died as the result of angioinvasive pulmonary mucormycosis and bacterial pneumonia associated with diabetes mellitus and COVID-19 (SARS-CoV-2) infection.

MANNER OF DEATH: Natural

Jessica B. Dwyer, M.D.

Medical Examiner
