Summary of Incident

Summary of How the Death Occurred: (max. 30,000 characters)

Summary:

On June 20, 2025 at approximately 0347 hrs, Officers from the Methodist Health System Police Department responded to a behavioral emergency involving a patient under an emergency health detention (APOWW) in the Emergency Department. The patient, identified as Devin Giles, was attempting to remove medical restraints applied by hospital staff.

Officers assisted clinical personnel while they resecured the medical restraints to ensure the safety of the patient and the staff. During this interaction, Mr. Giles raised his arms and moved towards those present. It remains unclear whether the movement was intentional resistance, confusion or a non-directed attempt to remove the restraints.

Officers remained only for the duration necessary to assist with the restraint application and exited the area once the patient was secured. They were later informed that Mr. Giles experienced a medical emergency. Staff were unable to provide a specific timeline as to when the medical emergency began.

Per Autopsy:
CONCLUSION
Based on the autopsy and history available to me, it is my opinion that Devin Le'Tay Giles, a 30-year-old male, died as a result of cardiac arrest due to the sequelae of methamphetamine use and increased physiologic stress during acute psychosis. Contributory to death was diabetes mellitus.
